

Career Copilot Premium

Installation & Activation Guide

Version 1.0.7

 Windows

 macOS

Windows Installation & Activation

1 Run the installer

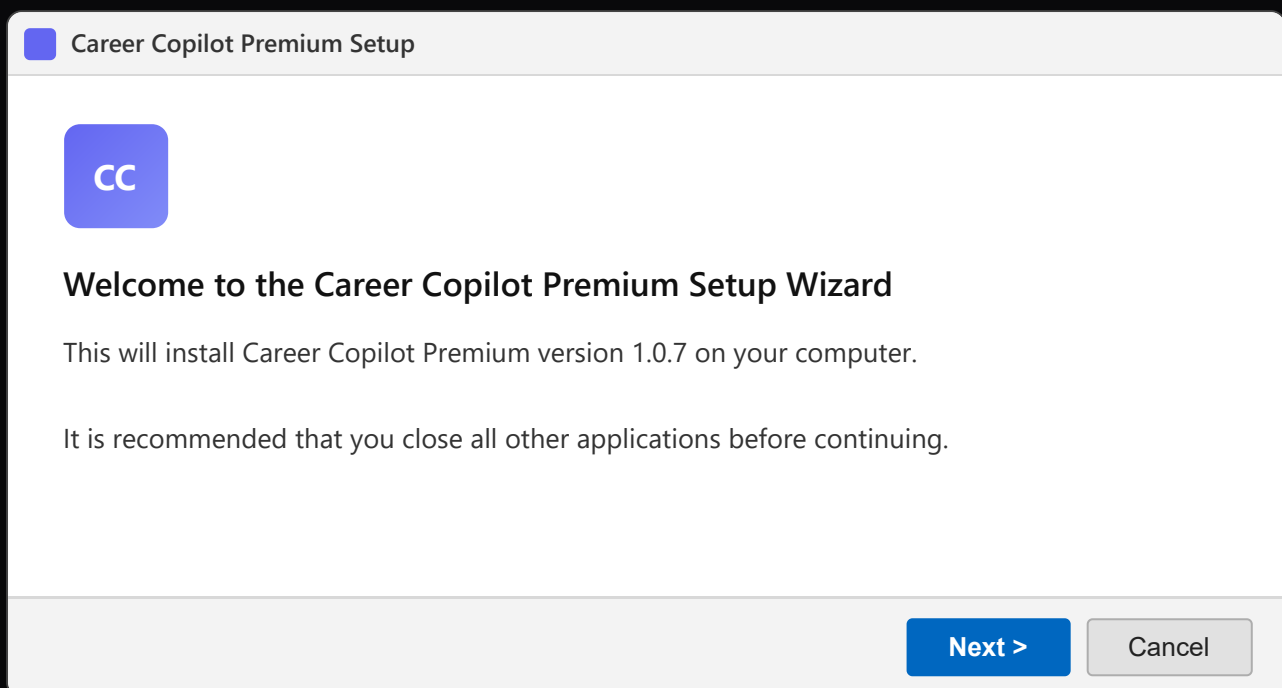

ILLUSTRATED

Double-click `CareerCopilotPremium_Setup_v1.0.7.exe`. Windows will ask for permission to make changes to this device — this is normal for any installer.

*Client clicks **Yes** to continue. "Unknown publisher" is expected — the app isn't code-signed yet.*

2 Setup wizard — Welcome

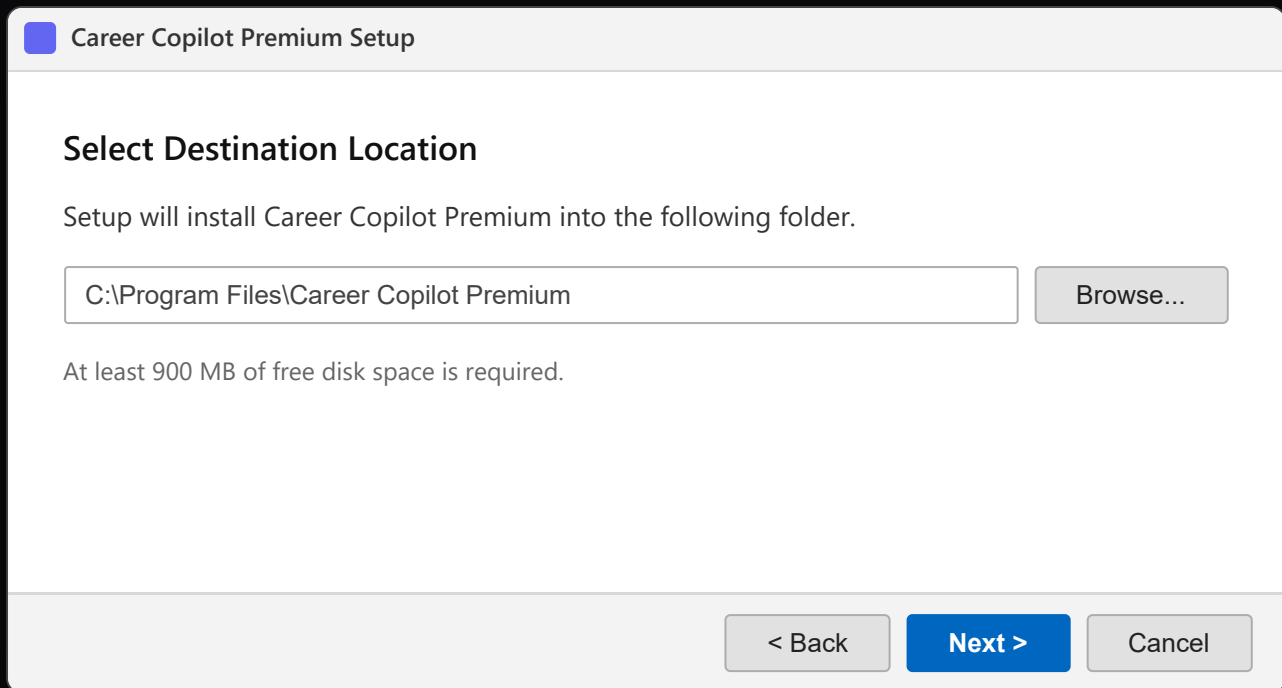

ILLUSTRATED

*Client clicks **Next**.*

3

Choose install location

ILLUSTRATED

Career Copilot Premium Setup

Select Destination Location

Setup will install Career Copilot Premium into the following folder.

C:\Program Files\Career Copilot Premium Browse...

At least 900 MB of free disk space is required.

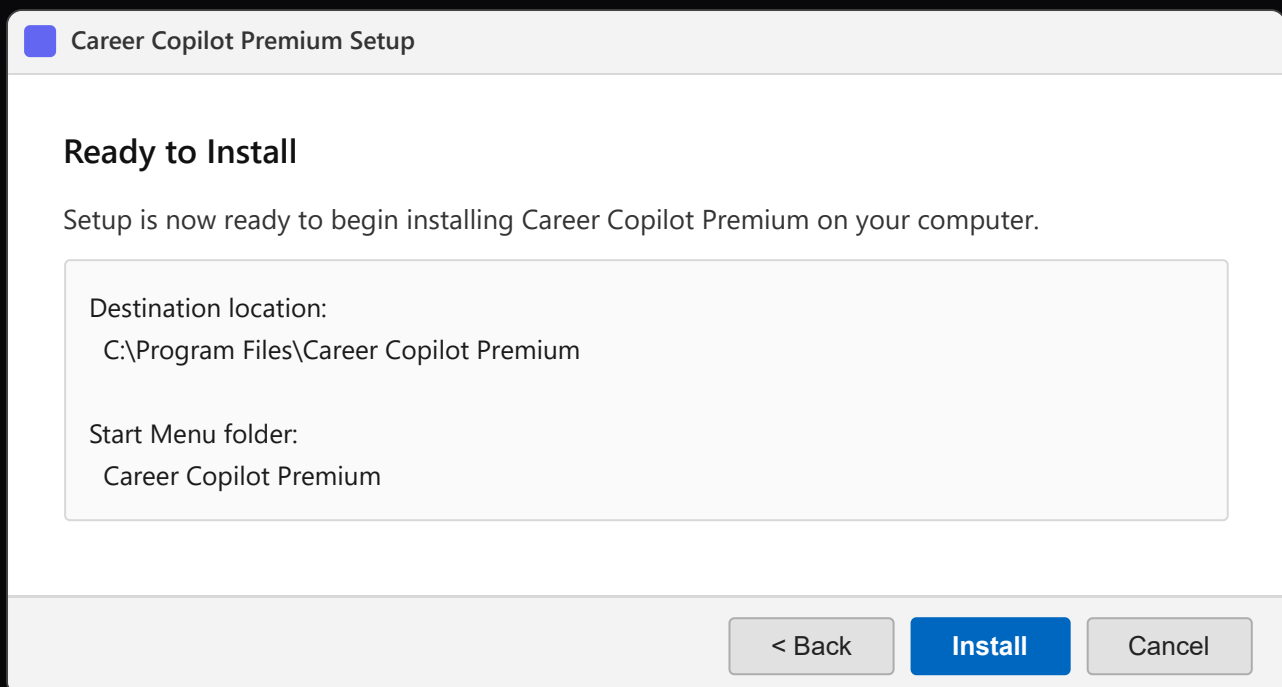

< Back **Next >** Cancel

*Default location is fine — client just clicks **Next**.*

4

Ready to install

ILLUSTRATED

Career Copilot Premium Setup

Ready to Install

Setup is now ready to begin installing Career Copilot Premium on your computer.

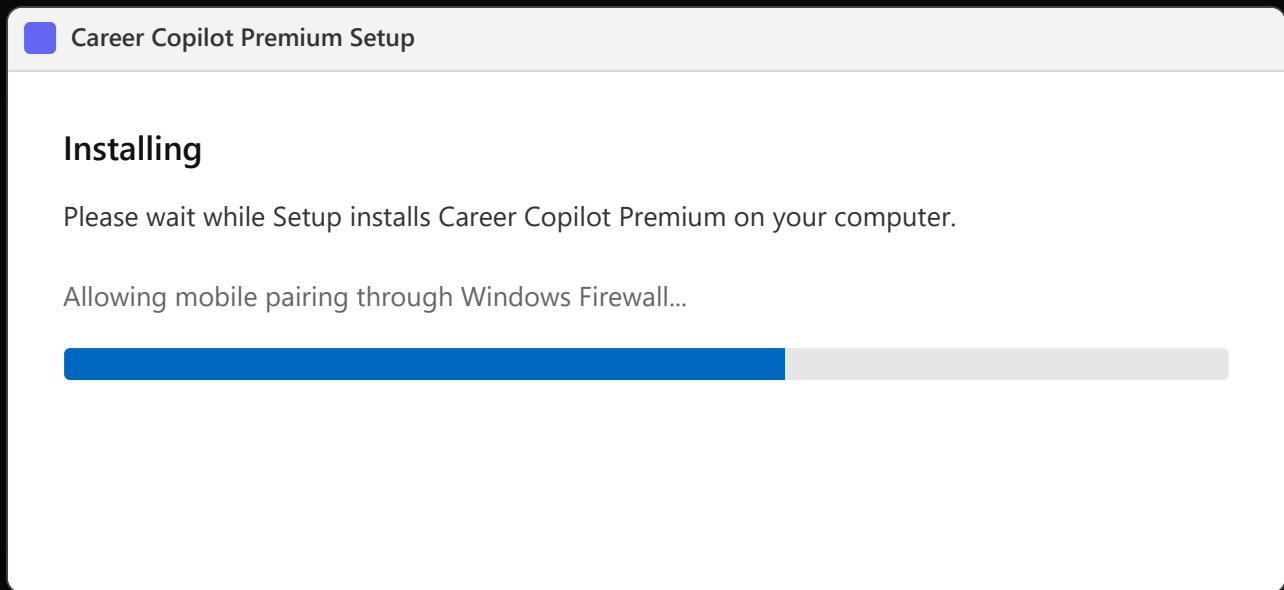

Destination location:
C:\Program Files\Career Copilot Premium

Start Menu folder:
Career Copilot Premium

< Back **Install** Cancel

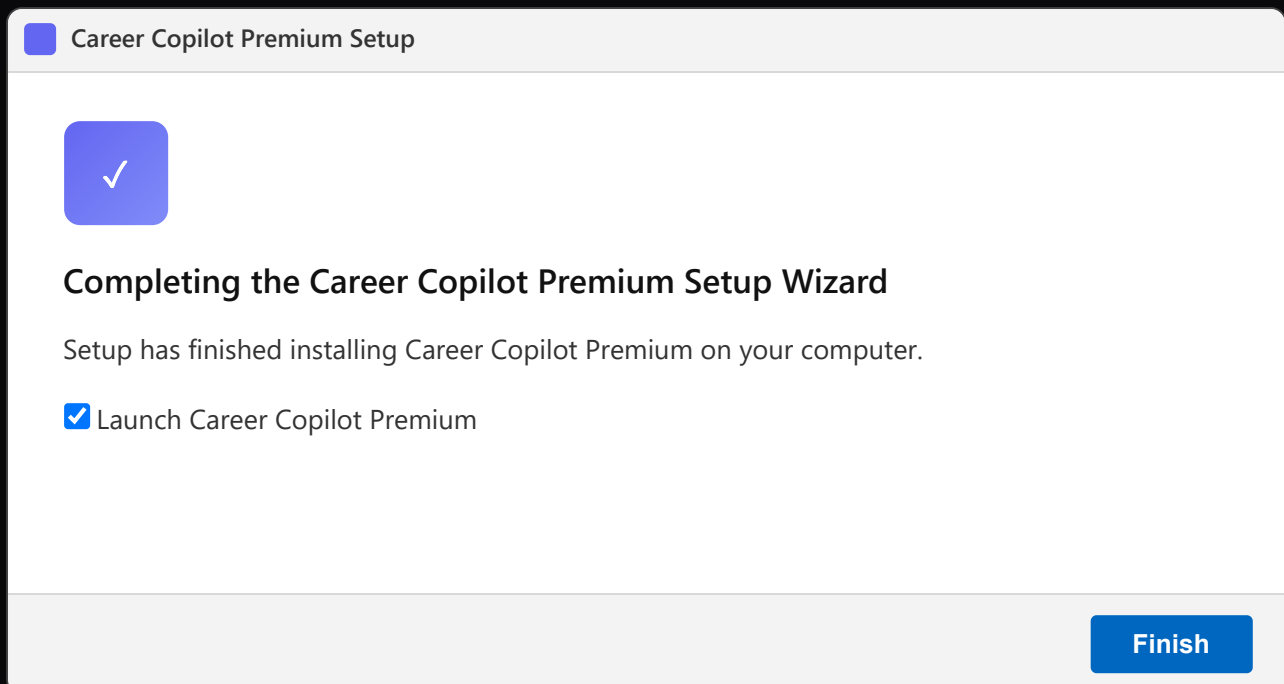

*Client clicks **Install**.*

5 Installing ILLUSTRATED

Takes under a minute. This step also adds a Windows Firewall rule so your phone can pair with the desktop app over Wi-Fi.

6 Finish ILLUSTRATED

*Client clicks **Finish** — the app launches automatically.*

7 First launch — Mistral API key ILLUSTRATED

A small always-on-top window appears before the main app opens, matching the app's dark theme.

Career Copilot Premium — First-Time Setup

Career Copilot Premium

Connect your free Mistral API key

Get a free key at console.mistral.ai — required once per computer.
Sign up → API Keys → Create key → paste below.

..... Paste Mistral API key here...

Get Free Key at console.mistral.ai

Verify & Save

Client clicks **Get Free Key**, signs up free at console.mistral.ai, creates a key, pastes it, clicks **Verify & Save**.

8 Activate this computer

REAL SCREENSHOT

The app's dashboard opens in a window and immediately shows the activation screen — this is the actual app UI, unmodified.

CC Career Copilot Premium Session offline

Activate This Computer

Career Copilot Premium is locked to one desktop machine. Send the request code below to the seller, then paste the activation code you receive.

COMPUTER
DESKTOP-T0A7NGI

REQUEST CODE
CCP-1D03-B7EB-EA43-381A-17FE

ACTIVATION CODE
ACT-XXXX-XXXX-XXXX-XXXX

Activate Desktop

What the client does: copies the **Request Code** (starts with `CCP-`) and sends it to **Faraz Automation** (email, WhatsApp, or however you deliver support). You run:

```
python scripts/generate_activation_code.py CCP-XXXX-XXXX-XXXX-XXXX
```

and send back the resulting **Activation Code** (starts with `ACT-`). Client pastes it into the field and clicks **Activate Desktop**.

Activation is bound to this one computer and is stored locally — it survives restarts and reboots (verified in testing: a fresh process reading the same license file reports activated with no re-entry needed).

After activation, the app walks the client through a 3-step profile setup — only needed once.

← Home

Setup

1 OF 3

Your resume

Upload a PDF or describe your role in your own words. Either works.

Resume PDF

Choose File

No file chosen

Optional if you fill the description below.

Or describe your role

Who you help, what you sell, and what makes you stand out.

Continue

Step 1 of 3 — upload a resume PDF, or just describe the role in plain words.

← Home

Setup

2 OF 3

Your profile

This anchors every session and shows up in your session history.

Your name

Your name

Target role or product

e.g. Senior Backend Engineer

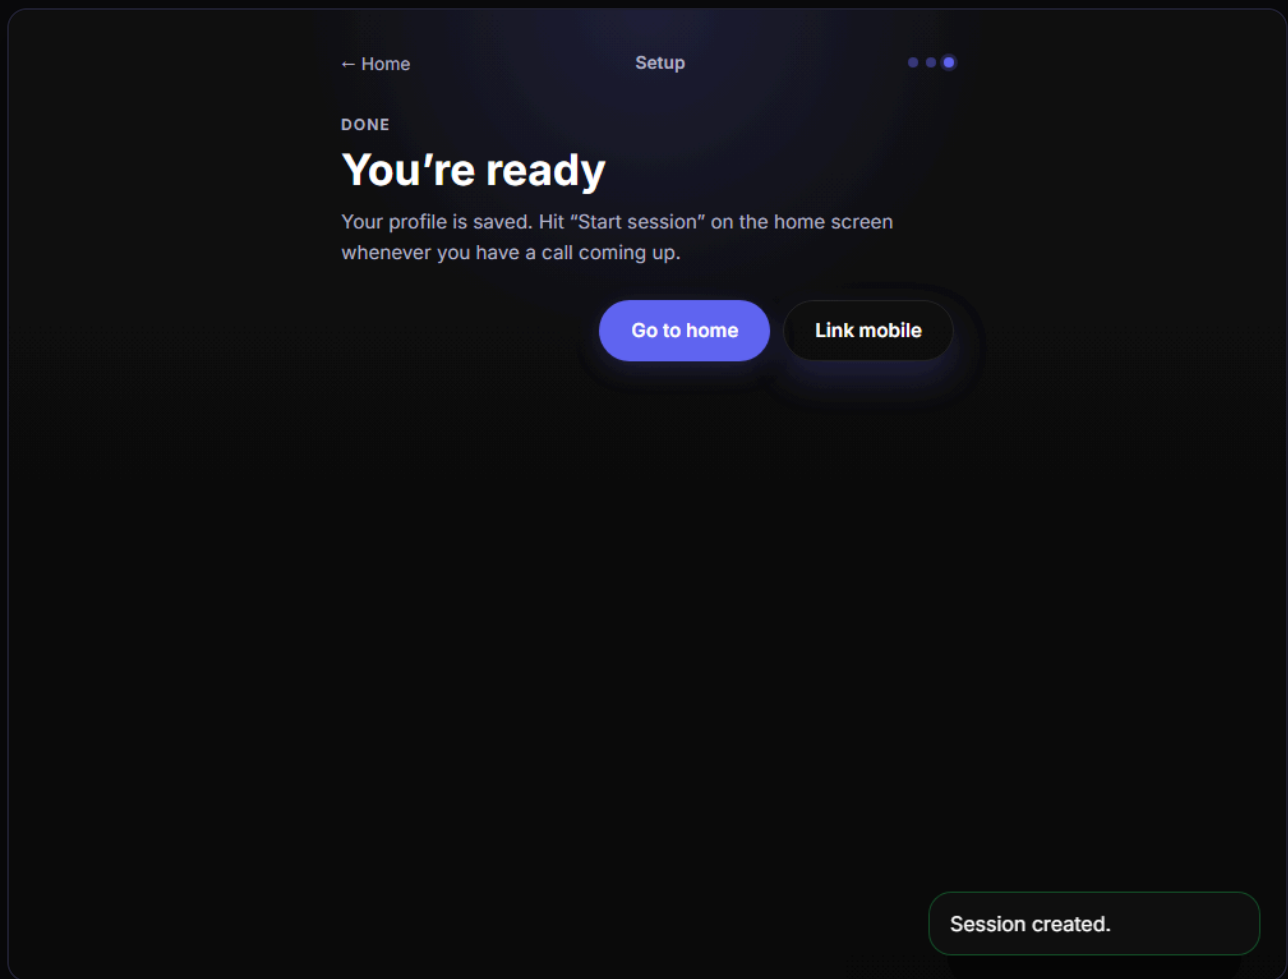

Current role
(optional)

e.g. Software Engineer at Acme

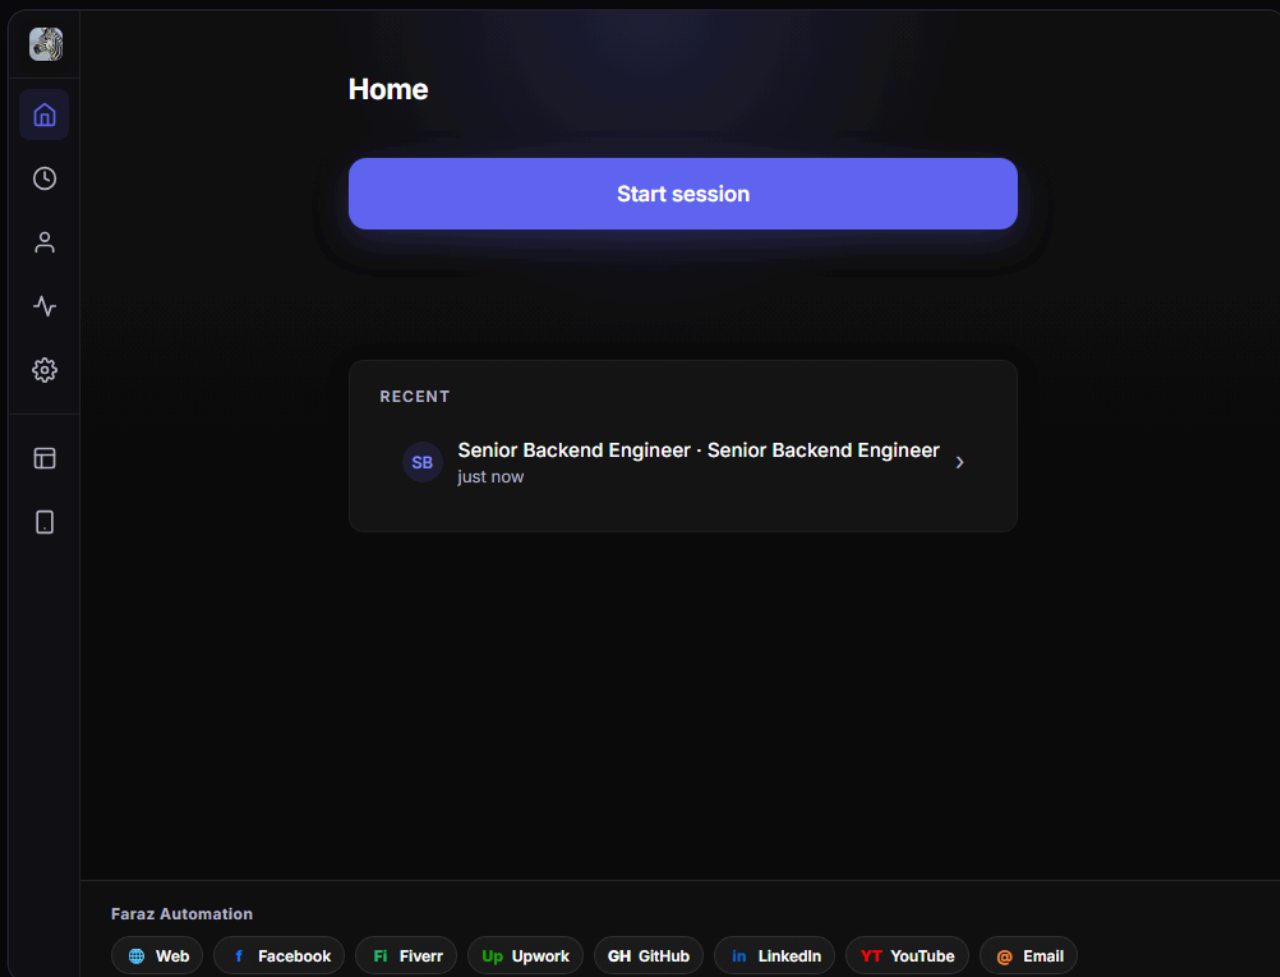

Back

Create session

Step 2 of 3 — name and target role. Clicking "Create session" submits both steps at once.

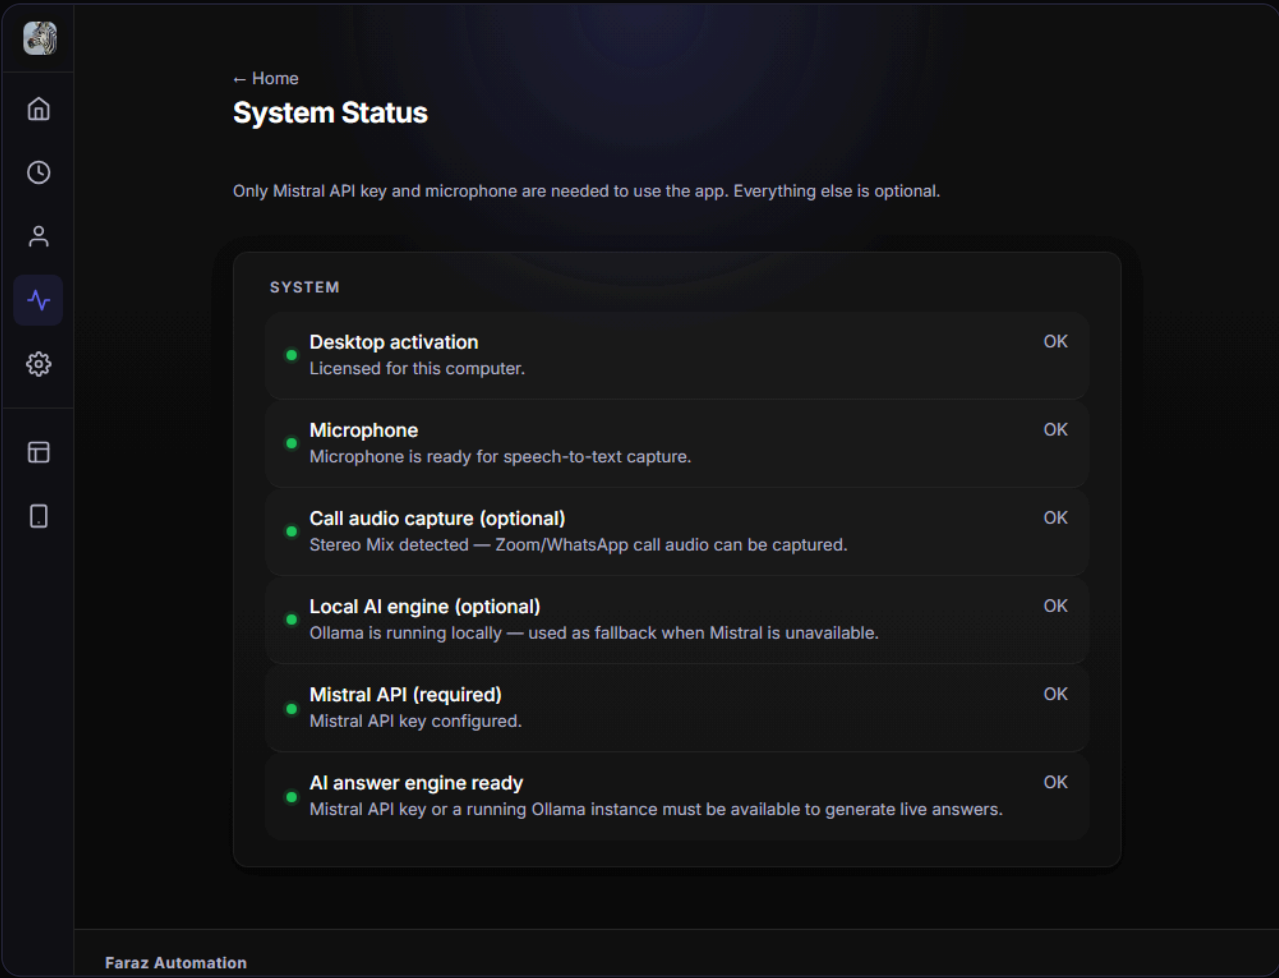

Step 3 — confirmation. Client clicks "Go to home".

The client is ready to use the app — "Start session" begins a live interview session.

Worth showing the client once — confirms only Mistral + microphone are required, everything else is optional.

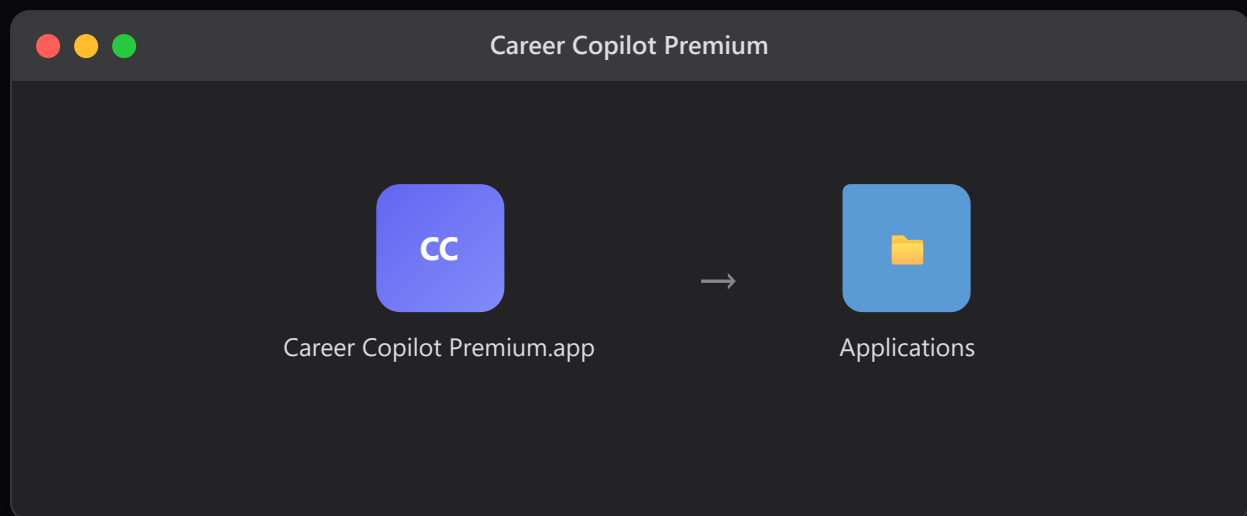

macOS Installation & Activation

Steps 1–6 below are macOS-specific (mounting the disk image, Gatekeeper). From Step 7 onward the app itself is identical to Windows — same activation screen, same setup wizard, same dashboard — because it's the same Flask-based UI on every platform.

1 Mount the disk image ILLUSTRATED

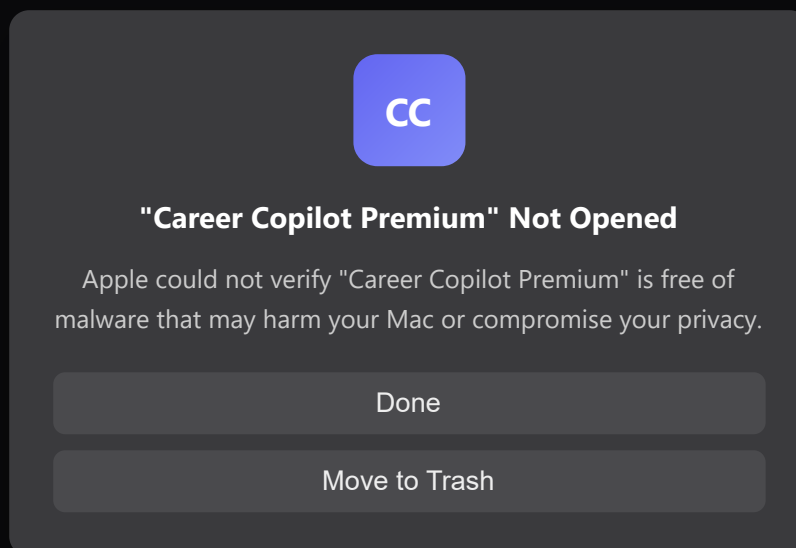

Client double-clicks `CareerCopilotPremium-mac.dmg`. A Finder window opens automatically.

Client drags **Career Copilot Premium** onto the **Applications** shortcut to install it, then ejects the disk image.

2 First open — Gatekeeper warning ILLUSTRATED

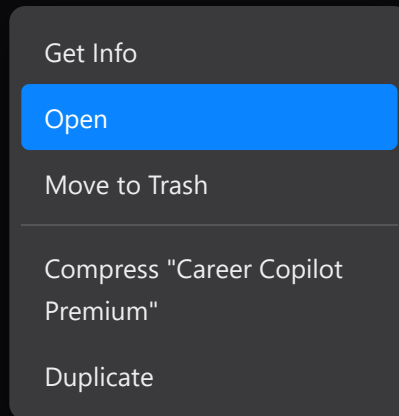

The app isn't notarized by Apple yet, so macOS blocks a plain double-click the first time.

Client clicks **Done** — do not delete the app. Continue to Step 3 to open it properly.

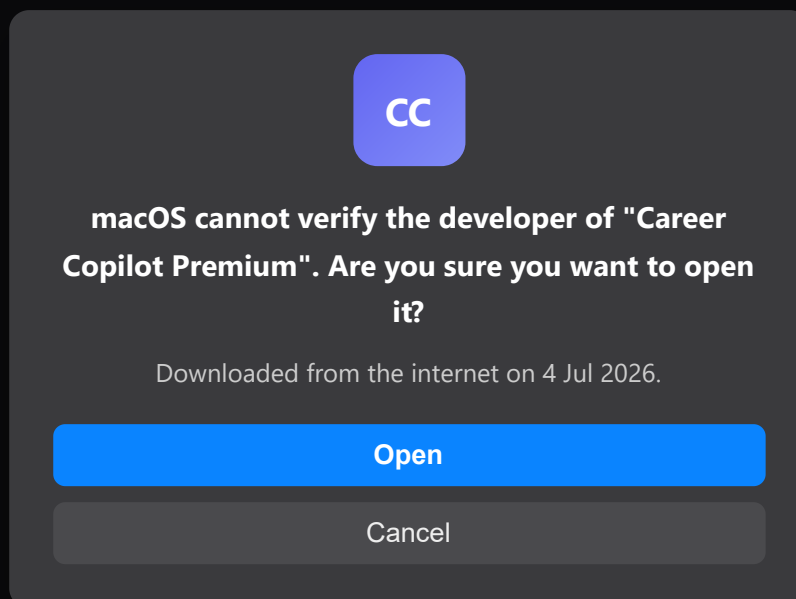

3 Right-click → Open ILLUSTRATED

In Applications, Control-click (or right-click) the app icon instead of double-clicking.

Click **Open** from this menu — a confirmation dialog appears next.

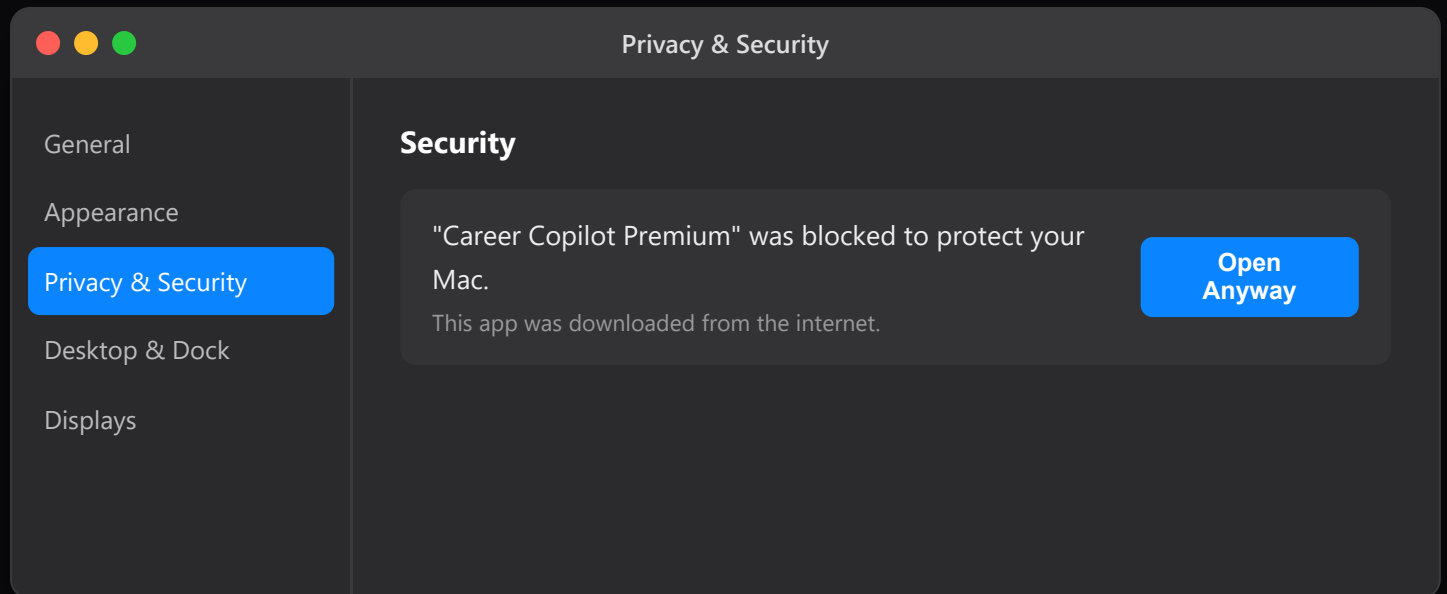

4 Confirm open ILLUSTRATED

Client clicks **Open**. This confirmation is only needed once — future launches open normally with a double-click.

5 Fallback — Privacy & Security settings ILLUSTRATED

If step 3 doesn't show an "Open" option (varies slightly by macOS version), this always works: **System Settings** → **Privacy & Security**.

*Client clicks **Open Anyway**, then confirms with Touch ID or their Mac password.*

6 Optional — call audio (BlackHole) ILLUSTRATED

Only needed if the client wants the interviewer's voice (Zoom/Meet) transcribed too — microphone-only works fine without it.

```
alex@MacBook-Pro ~ % brew install blackhole-2ch
==> Downloading blackhole-2ch...
==> Installing blackhole-2ch
📦 blackhole-2ch was successfully installed!
```

Then create a Multi-Output Device in Audio MIDI Setup so the client can still hear the call while it's captured.

7 Activation & setup wizard REAL SCREENSHOT

From here on, the experience is byte-for-byte identical to Windows — same dashboard, same screens.

CC Career Copilot Premium

Session offline

Activate This Computer

Career Copilot Premium is locked to one desktop machine. Send the request code below to the seller, then paste the activation code you receive.

COMPUTER

DESKTOP-T0A7NGI

REQUEST CODE

CCP-1D03-B7EB-EA43-381A-17FE

ACTIVATION CODE

ACT-XXXX-XXXX-XXXX-XXXX-XXXX

Activate Desktop

Same Request Code / Activation Code flow as Windows Step 8 — send Request Code to Faraz Automation, receive Activation Code back.
